

RITESH PATEL-MANAGING DIRECTOR

Ritesh Patel is the visionary architect behind Felix Industries' rise to prominence as a global leader in sustainable industrial solutions. With a career deeply rooted in innovative problem-solving, he has consistently displayed an unwavering commitment to addressing critical environmental challenges. His expertise, spanning over two decades, covers a broad spectrum of technologies, including advanced specialty membranes, reverse osmosis systems, and energy-efficient wastewater treatment. Ritesh's work exemplifies how technical expertise can be transformed into scalable, real-world solutions that positively impact industries and communities worldwide.

Ritesh's strategic leadership has been instrumental in driving Felix Industries' expansion across diverse sectors and geographies. He has played a crucial role in the development and growth of key subsidiaries, each addressing critical environmental and industrial challenges. Among them, Felix Industries LLC specializes in solid waste management, hydrocarbons, and oil refining and recycling. Felix WMC Private Limited focuses on processing borewell and surface water, as well as wastewater solutions for both commercial and residential needs. Rivita Solutions Private Limited pioneers in the operation of cutting-edge oil and gas technologies and plants, while Ennovation Aquaprocess Private Limited excels in advanced mixed salt separation processing.

These subsidiaries work in synergy with Felix Industries' core operations, forming a comprehensive ecosystem of innovation and sustainability. Under Ritesh's guidance, each venture aligns seamlessly with the company's overarching vision of operational excellence, sustainable growth, and environmental stewardship, reinforcing its position as a leader in sustainable industrial solutions.

Beyond technology, Ritesh has championed the integration of clean energy solutions, such as renewable energy-powered wastewater treatment systems and low-carbon footprint processes for solid waste management. His visionary approach has allowed Felix Industries to deliver tailored solutions for emerging markets, addressing their unique socio-economic and environmental challenges. This strategy has placed the company at the forefront of sustainability-driven industrial evolution.

Under Ritesh's dynamic leadership, Felix Industries has not only excelled in core environmental engineering but also diversified into related fields through strategic acquisitions and partnerships. The acquisition of Ennovation Aqua Process Private Limited added a technological edge to the company's portfolio, enabling the development of proprietary solutions in water treatment and process automation. Such initiatives have bolstered Felix Industries' ability to tackle complex projects, cementing its reputation as a full-spectrum EPC (Engineering, Procurement, and Construction) powerhouse.

Ritesh's contributions extend far beyond operational strategy. He emphasizes fostering an internal culture of innovation and sustainability, mentoring high-performing teams, and embedding long-term values across every subsidiary. His dedication to nurturing talent and building cohesive, goal-driven teams ensures the successful execution of projects from concept to commissioning.

Felix Industries' subsidiaries have flourished under Ritesh's stewardship, contributing significantly to the company's balanced growth. Whether through technological innovation in water management by Felix WMC, forays into government initiatives like the Jal Jeevan Mission and AMRUT, or exploring opportunities in oil and gas technologies via Rivita Solutions, each subsidiary complements the parent company's vision of sustainable industrial development.

Ritesh Patel's legacy is one of harmonizing industrial innovation with ecological responsibility. By nurturing Felix Industries and its subsidiaries into robust, future-ready enterprises, he has firmly positioned the company as a catalyst for sustainable development on a global stage. His journey continues to inspire a generation of leaders dedicated to building a greener, more resilient world.

VINAY PATEL-WHOLE TIME DIRECTOR

With over 40 years of experience in environmental field. I have worked as Senior Administrator and have looked after all the Environmental regulations, legal compliances, research, preparing regulatory framework, limit and structure operations of industry and government to reduce environmental impacts and to conserve resources both for the environment and the industry.
